Subject: Leeds Pond

Dear Plandome Manor,

my name is Frank Vincenti and I have a local wildlife group. I specialize in mitigating conflict between the public and local wildlife.

I am writing in regards to Leeds Pond. I support the right of people to have homes built where they like and sound development. But I also support the need to adhere to the environment and making it where it is suitable for both people and the natural world. Responsibility towards keeping water clean and safeguarding wetlands and wildlife habitat is essential to the human spirit.

If great care is not included in not only the sustainability of our surrounding nature as well as catering to the needs and dreams of the public, we have lost . Also, keep in mind that displacement of wildlife causes them to come closer to homesnas they do not have the habitat anylonger.

Surely there must be a way to satisfy the publics right and dreams of a home as well as preserving the surrounding habitats for birdlife, wildlife and pondlife.

Thank you,

Frank Vincenti
